

## Flutter Developer Assignment

### **Task Details:**

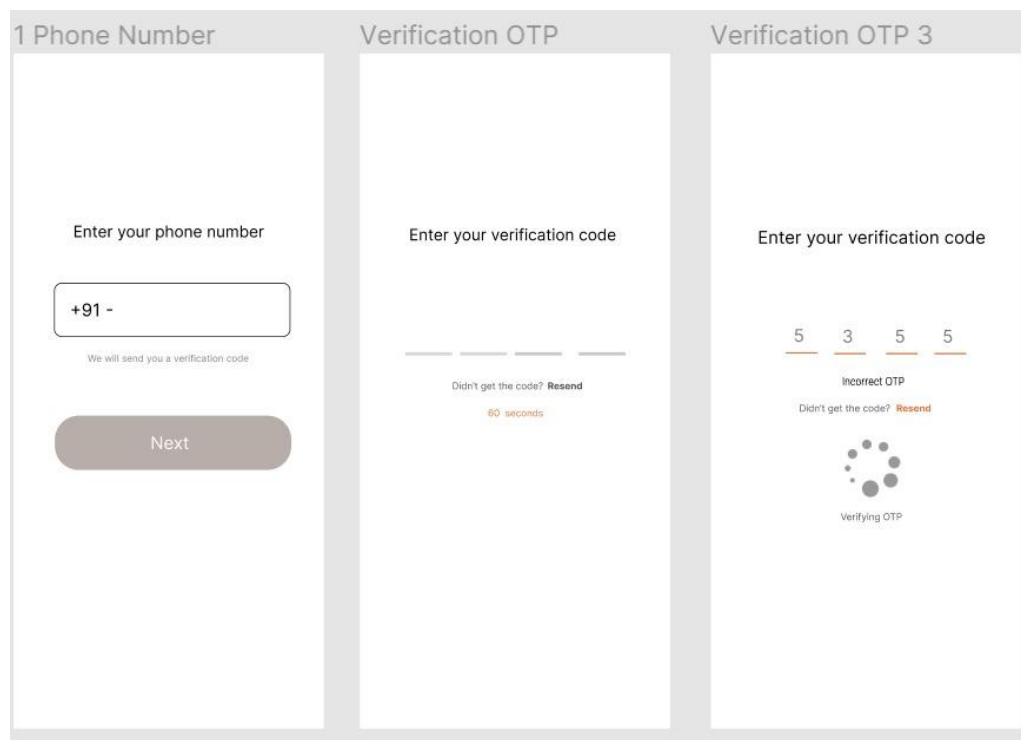

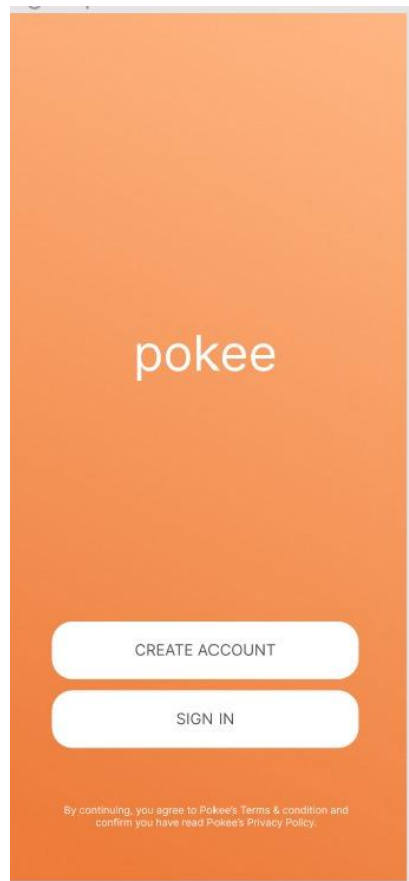

Design a user signup/login flow using firebase phone authentication using OTP and take the following user details:

- First name
- Last Name
- User Name
- UserId
- PhoneNumber

Design a user profile page to display the following:

- User Name
- Display Name
- Photo URL (as provided in the GET response)

You can use the following sample screens for reference:

First name	First name 3	Last name	Last name 3	Username	User Name 3
<p>What's your first name?</p> <input type="text"/> <p>Next</p>	<p>What's your first name?</p> <input type="text" value="Rohit"/> <p>Next</p>	<p>What's your lastname?</p> <input type="text"/> <p>Next</p>	<p>What's your lastname?</p> <input type="text" value="Sharma"/> <p>Next</p>	<p>User Name</p> <input type="text"/> <p>Next</p>	<p>User Name</p> <input type="text" value="RohitSharma22"/> <p>Next</p> <p><small>You can pick username from given Suggestions : Username1,Username</small></p>

## Integrate the following backend APIs

### Submit User Details POST API :

```
curl --location 'user-service.pokee.app/v1/user/' \
--header 'Content-Type: application/json' \
--data '{
  "id" : "dlfkj4589sdjhhl", // uld from firebase
  "first_name" : "Ritu",
  "last_name" : "Dadhwai",
  "user_name" : "ritu_1997",
  "phone_number" : "8388908302"
}'
```

Sample Response:

```
{
  "id": "dlfkj4589sdjhhl",
  "display_name": "Ritu Dadhwai",
  "user_name": "ritu_1997",
  "phone_number": "8388908302"
}
```

### Fetch user details GET API:

```
curl --location 'user-service.pokee.app/v1/user/:id'
```

**Note:** Here *:id* is the userId

Sample Response:

```
{
  "id": "dlfkj4589sdjhhl",
  "display_name": "Ritu Dadhwai",
  "user_name": "ritu_1997",
  "phone_number": "8388908302"
}
```

## Submission Deadline

<3 day submission deadline>
